

Anna Maria Sempreviva, Senior Scientist, Department of Wind Energy, Technical University of Denmark, Denmark

Anna Maria Sempreviva has been working in the wind energy sector since 1984 starting with the European Wind Atlas in the Italian team at the Italian National Council of Research, CNR. She owns a PhD in Atmospheric Physics. Activities at CNR: head of section; member of the EERA JPWind Steering Committee as coordinator of Italian wind energy groups; Coordinator of the energy theme within the CNR S&T Foresight Programme. Since 2014, at the Technical University of Denmark, DTU, department of Wind Energy, previous Risoe National Laboratory. Since the 1990s she has been consultant for due diligence tasks for the large offshore Danish Wind Farms and for Italian project developers. She has been in the EERA JPWind Management Board as vice-chair for the Sub Programme on Wind Conditions. At present she is coordinating the EU funded IRPWind project core group tasked with creating metadata and taxonomy for the information architecture of a Wind Energy data portal.
